

Where ideas work

**Ministry of Transportation and Infrastructure
Victoria, BC.**

**Ministry Chief Information Officer
\$124,000.09 - \$151,800.07 annually**

The Ministry of Transportation and Infrastructure plans transportation networks, provides transportation services and infrastructure, develops, and implements transportation policies, and administers many related acts, regulations, and federal-provincial funding programs. The Ministry strives to build and maintain a safe and reliable transportation system and provide affordable, efficient, and accessible transportation options for all British Columbians. This work includes investing in road infrastructure, public transit, cycling network improvements and other green modes of transportation, reducing transportation-related greenhouse gas emissions, and strengthening the economy through the movement of people and goods.

The Ministry Chief Information Officer provides vision and leadership for developing and implementing information technology solutions and initiatives that improve cost effectiveness, service quality and access to services. This position interacts with senior officials across the provincial government and leads the development and implementation of major and highly complex/innovative information, digital strategies, and technology solutions.

Qualifications for this role include:

- Completion of a degree, diploma, certification, or equivalent in the computer science or related field; an equivalent combination of education, experience and training may be considered.
- Experience with strategic planning and business transformation in a technology-dependent business area or information systems branch.
- Experience building and maintaining strong relationships and partnerships with stakeholders.
- Experience leading, developing and implementing information management and information technology policies, programs and projects in a complex systems environment including data security and data management.
- Experience responding to internal and external IT audits and implementing recommendations.
- Experience negotiating and managing information technology contracts.
- Experience managing professional staff, project teams and divisional budgets.
- Experience in cybersecurity, preferably with a recognized certification such as CISSP, would be an asset.
- Preference may be given for experience in transformational leadership within a large organization.
